Important information

Proper use

The machine is designed and intended for private domestic use. It should only be used for coffee preparation and to heat milk and water. Use for any other purpose will be deemed improper. JURA Elektroapparate AG cannot accept any responsibility for the consequences of improper use.

Before using the machine read these instructions for use thoroughly and completely and comply with the instructions they contain. A warranty service is not applicable for damage or defects caused by non-compliance with the instructions for use. Keep these instructions for use close to the machine and pass them on to the next user.

For your safety

Please carefully read and observe the important safety information set out below.

To avoid danger of potentially fatal electric shock:

- Never use a machine which is damaged or has a defective mains cable.
- In the event of signs of damage, for example if there is a smell of burning, unplug the machine immediately from the mains supply and contact JURA service.
- If the mains cable of this machine is damaged, it must be repaired either directly by JURA or by an authorised JURA service centre.
- Make sure that the IMPRESSA and the mains cable are not located close to hot surfaces.
- Be careful to ensure that the mains cable is not trapped and does not rub against sharp edges.
Never open and repair the machine yourself. Do not modify the machine in any way that is not described in these instructions for use. The machine contains live parts. If opened, there is a danger of potentially fatal injury. Repairs may only be carried out by authorised JURA service centres, using original spare parts and accessories.

To completely and safely disconnect the machine from the power supply, first switch off the IMPRESSA using the On/Off button and then at the power switch. Only then should you remove the mains plug from the power socket.

There is a risk of scalds or burns on the spouts and the cappuccino frother.
- Place the machine out of the reach of children.
- Do not touch any hot parts. Use the handles provided.
- Ensure that the cappuccino frother is correctly fitted and clean. If incorrectly fitted or if they become blocked, the cappuccino frother or its parts might come off.

A defective machine is not safe and could cause injury or fire. To avoid damage and any associated risk of injury or fire:
- Never allow the mains cable to loosely hang down. The mains cable could pose a tripping hazard or become damaged.
- Protect the IMPRESSA from environmental influences such as rain, frost and direct sunlight.
Important information

- Do not immerse the IMPRESSA, mains cable or connections in water.
- Do not put the IMPRESSA or any individual parts in the dishwasher.
- Switch your IMPRESSA off at the power switch before any cleaning operation. Always wipe the IMPRESSA with a damp cloth rather than a wet one, and protect it from prolonged exposure to water splash.
- Only connect the machine to the mains voltage in accordance with the information on the rating plate. The rating plate is located on the underside of your IMPRESSA. Further technical data is provided in these instructions for use (see Chapter 9 ‘Technical data’).
- Please only use original JURA maintenance products. Use of products that are not explicitly recommended by JURA could damage the IMPRESSA.
- Do not use any coffee beans treated with additives or caramelised coffee beans.
- Only fill the water tank with fresh, cold water.
- Switch the machine off at the power switch if you are going to be absent for a longer period of time.
- Children may not clean or service the machine unless supervised by a responsible person.
- Do not allow children to play with the machine.
Important information

- Keep children under the age of 8 away from the machine, or supervise them constantly.
- Children aged 8 and over may only operate the machine without supervision if they have been instructed in how to use it safely. Children must be able to recognise and understand the potential dangers arising from incorrect use.

People, including children, who
- do not have the physical, sensory or mental capabilities to use the machine safely or
- are inexperienced or lack knowledge in how to use the machine safely
must be supervised by a responsible person when using it, or must be instructed in how to use it correctly.

Safety when handling the CLARIS Blue filter cartridge:
- Filter cartridges should be kept out of the reach of children.
- Store filter cartridges in a dry place in the sealed packaging.
- Protect cartridges from heat and direct sunlight.
- Do not use damaged filter cartridges.
- Do not open filter cartridges.
1 Preparing and using for the first time

JURA on the Internet
Visit us on the Internet. You can download short operating instructions for your machine from the JURA website (www.jura.com). You will also find interesting and up-to-date information on your IMPRESSA and on every aspect of coffee.

Setting up the machine
When setting up your IMPRESSA, please note the following:
- Place the IMPRESSA on a horizontal surface that is not sensitive to water.
- Choose a spot for your IMPRESSA which protects the machine against overheating. Ensure that the ventilation slots are not covered.

Filling the water tank
To enjoy the perfect cup of coffee we recommend changing the water every day.

CAUTION
Milk, sparkling mineral water or other liquids can damage the water tank or the machine.
- Only fill the water tank with fresh, cold water.
  - Open the water tank cover.
  - Remove the water tank and rinse it with cold water.
  - Fill the water tank with fresh, cold water and reinsert the tank.
  - Close the water tank cover.
Preparing and using for the first time

The bean container has an aroma preservation cover. This will ensure that your coffee beans retain their aroma for longer.

**CAUTION**

Coffee beans which have been treated with additives (e.g. sugar), ground coffee or freeze-dried coffee will damage the grinder.

- Only use roasted, untreated coffee beans to fill the bean container.
- Open the bean container cover and remove the aroma preservation cover.
- Remove any dirt or foreign objects from inside the bean container.
- Fill the bean container with coffee beans, then close the aroma preservation cover and the bean container cover.

First-time use

**WARNING**

If the machine is operated with a defective mains cable, there is a danger of potentially fatal electric shock.

- Never use a machine which is damaged or has a defective mains cable.

Precondition: The water tank and bean container have been filled.

- Insert the mains plug into a power socket.
- Switch on the IMPRESSA using the power switch on the right-hand side of the machine.
- Press the On/Off button to switch the IMPRESSA on.

The JURA logo appears. The display then shows the languages you can choose from.

To display more languages, press the ‘Next’ button (bottom right).

- Press the button that corresponds to the language you want, e.g. ‘English’.

‘Saved’ appears briefly on the display to confirm the setting. ‘Please press the Rotary Switch.’, the Rotary Switch lights up.
1 Preparing and using for the first time

Place a receptacle under the cappuccino frother.

Press the Rotary Switch.

‘System is filling.’, the system fills up with water. The operation stops automatically.

‘Please press the Rotary Switch.’

Place a receptacle under the coffee spout.

Press the Rotary Switch.

‘Machine is rinsing.’, the machine rinses. The operation stops automatically. ‘Please select product:’ appears on the display. The IMPRESSA is now ready for use.

The display shows the products you can prepare.

Inserting and activating the filter

Your IMPRESSA no longer has to be descaled if you are using the CLARIS Blue filter cartridge. If the water hardness is 10 °dH or more, we recommend using the filter cartridge.

If you do not know the hardness of your water, you must find this out first (see Chapter 1 ‘Preparing and using for the first time – Determining the water hardness’).

Perform the ‘inserting the filter’ operation without any interruptions. This will ensure that your IMPRESSA always produces its best.

Precondition: ‘Please select product:’ is displayed.

Press the P button.

‘Maintenance status (1/6)’

Turn the Rotary Switch until the programme item ‘Maintenance settings (3/6)’ is displayed.

Press the ‘Filter’ button.

‘Filter’

Press the ‘Active’ button.

Press the ‘Save’ button.

‘Saved’ appears briefly on the display.

‘Insert filter’
Preparing and using for the first time

- Remove the filter cartridge extension from the Welcome Pack.
- Fit the filter extension on top of a CLARIS Blue filter cartridge.
- Remove and empty the water tank.
- Open the filter holder and insert the filter cartridge into the water tank, exerting slight pressure.
- Close the filter holder. It will click into place audibly.

After two months, the filter will cease to work. You can check the elapsed time by referring to the date plate on the filter holder in the water tank.

- Fill the water tank with fresh, cold water and reinsert the tank.
- Place a receptacle (at least 500 ml) under the cappuccino frother.
- Press the 'Next' button.
  ‘Filter is being rinsed.’, water flows out of the cappuccino frother.

You can interrupt rinsing of the filter at any time by pressing any button. Press the Rotary Switch \( \downarrow \) to continue rinsing of the filter.

The water may be slightly discoloured. This is not harmful to health and does not affect the taste.

Rinsing of the filter stops automatically after approximately 500 ml. The machine heats up. ‘Please select product:’ appears on the display. The filter is now activated.

If you are using the CLARIS Blue filter cartridge and have activated it in programming mode, you will not be able to adjust the water hardness.

The harder the water is, the more frequently the IMPRESSA needs to be descaled. It is therefore important to adjust the water hardness.

The water hardness can be adjusted on a continuous scale between 1°dH and 30°dH.
1 Preparing and using for the first time

Determining the water hardness

You can find out what the water hardness is by using the Aquadur® test strip supplied as standard.

- Hold the test strip briefly (for 1 second) under flowing water. Shake off the water.
- Wait for about one minute.
- You will then be able to read the degree of water hardness from the discolouration of the Aquadur® test strip and the description on the packaging.
You can now adjust the water hardness.

Precondition: ‘Please select product:’ is displayed.

P ▶ Press the P button.
   ‘Maintenance status (1/6)’
   ◁ Turn the Rotary Switch until the programme item ‘Maintenance settings (3/6)’ is displayed.
   ▶ Press the ‘Water hardness’ button.
   ‘Water hardness’
   ▶ Press the ‘<’ or ‘>’ button to set the water hardness.
   ▶ Press the ‘Save’ button.
   ‘Saved’ appears briefly on the display to confirm the setting.
   ‘Maintenance settings (3/6)’

P ▶ Press the P button to exit programming mode.
   ‘Please select product:’
Adjusting the grinder

You can adjust the grinder on a continuous scale to suit the degree of roast of your coffee.

CAUTION

If you adjust the consistency of grind when the grinder is not operating, the grinder adjustment switch could be damaged.

- Only adjust the consistency of grind when the grinder is running.

The consistency of grind setting is correct if the coffee flows regularly from the coffee spout. In addition a fine, thick crema forms.

Example: Proceed as follows to change the consistency of grind during the preparation of an espresso.

- Open the storage compartment cover.
- Place a cup under the coffee spout.
- Press the ‘Espresso’ button.
  The grinder starts up. ‘Espresso’ is displayed.
- Turn the grinder adjustment switch to the desired position while the grinder is running.
  The espresso is prepared and the consistency of grind is adjusted.
- Close the storage compartment cover.
2 Preparation

You can stop preparation of a specialty coffee, specialty coffee with milk or hot water at any time. Just press any button.

During the grinding operation you can select the coffee strength of individual products by turning the Rotary Switch ☐️: ☐️ (extra-mild), ☐️ ☐️ (mild), ☐️ ☐️ ☐️ (normal), ☐️ ☐️ ☐️ ☐️ (strong) or ☐️ ☐️ ☐️ ☐️ ☐️ (extra-strong).

During preparation, you can change the preset amount of water by turning the Rotary Switch ☐️ or pressing the ‘<’ and ‘>’ buttons.

You can follow the current status of preparation on the display.

You can make permanent settings for all products in programming mode (see Chapter 4 ‘Permanent settings in programming mode – Product settings’).

Ways of preparing a beverage

Only some of the specialty coffees you can prepare are shown on the display at any one time. As soon as you turn the Rotary Switch, more specialty coffees are displayed in the product selector. The product selector disappears automatically after 5 seconds if no preparation is started.

The following specialty coffees are displayed as standard:

- ‘Espresso’
- ‘Coffee’
- ‘Cappuccino’
- ‘Latte macchiato’
- ‘Hot water’
- ‘1 portion milk’

Additional specialty coffees in the product selector:

- ‘Ristretto’
- ‘2 espressi’
- ‘2 coffees’
- ‘2 ristretti’
Espresso and coffee

‘Espresso’ and ‘Coffee’ are prepared following this model.

Example: Proceed as follows to prepare one coffee.

1. Place a cup under the coffee spout.
2. Press the ‘Coffee’ button.
   Preparation will now begin. The preset amount of water for coffee flows into the cup. Preparation stops automatically and ‘Please select product:’ appears on the display.

Preparing two speciality coffees

To prepare two speciality coffees, either use the product selector or press the appropriate preparation button twice.

Example: Proceed as follows to prepare two coffees (using product selector).

1. Place two cups under the coffee spout.
2. Turn the Rotary Switch to view the product selector.
3. Turn the Rotary Switch until ‘2 coffees’ is displayed.
4. Press the Rotary Switch.
   Preparation starts and the preset amount of water for coffee flows into the cups. Preparation stops automatically and ‘Please select product:’ appears on the display.

Proceed as follows to prepare two cups of coffee at the touch of a button: Place two cups under the coffee spout. Press the ‘Coffee’ button twice (within two seconds) to start coffee preparation.
Latte macchiato, cappuccino

Your IMPRESSA can prepare a latte macchiato or cappuccino at the touch of a button. There is no need to move the glass or cup.

Example: Proceed as follows to prepare one latte macchiato.

- Remove the protective cover from the cappuccino frother.
- Attach the milk pipe to the cappuccino frother. Use the long pipe for a milk carton and the short pipe for a milk container.
- Insert the other end of the milk pipe into a milk carton or connect it to a milk container.
- Place a glass under the cappuccino frother.
- Turn the setting wheel of the cappuccino frother to the Milk Foam position 🤺.
- Press the ‘Latte macchiato’ button.
  ‘Latte macchiato’, the milk foam is prepared.
  Preparation stops automatically when the preset amount of milk is reached.

There is a short interval while the hot milk separates from the milk foam. This allows the typical layers of a latte macchiato to form. You can choose the length of this interval in programming mode (see Chapter 4 ‘Permanent settings in programming mode – Product settings’).

Coffee preparation starts. The preset amount of water flows into the glass. Preparation stops automatically and ‘Please select product:’ appears on the display.

To make sure the cappuccino frother always works properly, rinse and clean it regularly (see Chapter 5 ‘Maintenance – Rinsing the cappuccino frother’).
Example: Proceed as follows to prepare milk foam.

- Remove the protective cover from the cappuccino frother.
- Attach the milk pipe to the cappuccino frother. Use the long pipe for a milk carton and the short pipe for a milk container.
- Insert the other end of the milk pipe into a milk carton or connect it to a milk container.

- Place a cup under the cappuccino frother.
- Turn the setting wheel of the cappuccino frother to the Milk Foam position.

If you want to heat the milk turn the setting wheel of the cappuccino frother to the Milk position.

- Press the ‘1portion milk’ button.
  ‘1portion milk’
  As soon as the machine has heated up, ‘Please select product:’ appears.
- Press the ‘1portion milk’ button again.
  ‘1portion milk’, the milk foam is prepared. Preparation stops automatically when the preset amount of milk is reached.
  ‘Please select product:’ appears on the display.

To make sure the cappuccino frother always works properly, rinse and clean it regularly (see Chapter 5 ‘Maintenance – Rinsing the cappuccino frother’).

Ground coffee

You can choose to use a second coffee variety, for example decaffeinated coffee, with the filler funnel for ground coffee.

- Never add more than two level measuring spoons of ground coffee.
- Use ground coffee which is not ground too finely. Very fine coffee can block up the system so that the coffee only comes out in drips.
- If you did not fill the machine with a sufficient amount of ground coffee, ‘Not enough ground coffee’ is displayed and the IMPRESSA stops the operation.
The desired speciality coffee must be prepared within approximately one minute after filling with the ground coffee. Otherwise the IMPRESSA stops the operation and is once more ready for use.

All speciality coffees with ground coffee are prepared following this model.

Example: Proceed as follows to prepare one espresso using ground coffee.

1. Place an espresso cup under the coffee spout.
2. Open the cover of the filler funnel for ground coffee. ‘Please add ground coffee.’
3. Place one level measuring spoon of ground coffee into the filler funnel.
4. Close the cover of the filler funnel. ‘Please select product:’
5. Press the ‘Espresso’ button.

Preparation will now begin. The preset amount of water for espresso flows into the cup. Preparation stops automatically and ‘Please select product:’ appears on the display.

It is easy to make permanent settings for the amount of water for all speciality coffees and hot water according to the cup size. Adjust the amount once as shown in the following example. Every time you prepare a drink in the future, this amount of water will be dispensed.

The permanent settings for adapting the amount of water to the cup size for all speciality coffees and hot water follow this model.

Example: Proceed as follows to permanently set the amount of water for one coffee.

Precondition: ‘Please select product:’ is displayed.

1. Place a cup under the coffee spout.
2. Press and hold the ‘Coffee’ button. ‘Coffee’ and the fill volume are displayed.
4. Release the ‘Coffee’ button.

Preparation starts and the coffee flows into the cup.
Press any button as soon as there is sufficient coffee in the cup. Preparation stops. ‘Saved’ appears briefly on the display. The set amount of water for one coffee is permanently stored. ‘Please select product:’ appears on the display.

You can alter this setting at any time by repeating the above procedure.

You can also permanently set the amount for all speciality coffees and hot water in programming mode (see Chapter 4 ‘Permanent settings in programming mode – Product settings’).

To obtain a perfect water flow, use the hot-water nozzle. You can find the hot-water nozzle under the cover of the storage compartment.

The following temperatures can be selected for preparing hot water: ‘Low’, ‘Normal’, ‘X high’.

There is a danger of scalding from hot water splashes.

Avoid direct contact with the skin.

Carefully pull the cappuccino frother down and off.

Open the storage compartment cover, take out the hot-water nozzle and close the cover again.

Attach the hot-water nozzle to the connector.

Place a cup under the hot-water nozzle.

Press the ‘Hot water’ button.

‘Hot water’ and the temperature are displayed.

By pressing the ‘<’ or ‘>’ button several times (within approximately 2 seconds) you can set the temperature to your individual preference. This setting is not saved.

‘Hot water’, hot water flows into the cup. Preparation stops automatically and ‘Please select product:’ appears on the display.
3 Daily operation

Switching on

When the IMPRESSA is switched on, it automatically prompts you to perform the rinse operation. Start the rinse operation by pressing the Rotary Switch. In programming mode you can change this setting so that the machine starts the switch-on rinse automatically.

Precondition: Your IMPRESSA is switched on at the power switch.

- Place a receptacle under the coffee spout.
- Press the On/Off button to switch the IMPRESSA on.
  
  ‘Welcome to JURA’ appears on the display. The machine heats up.
  
  ‘Please press the Rotary Switch.’

- Press the Rotary Switch.
  
  The machine rinses. The operation stops automatically and ‘Please select product:’ appears on the display.

Daily maintenance

To ensure that you get many years of reliable service out of your IMPRESSA and to guarantee the optimum coffee quality, the machine requires daily maintenance.

- Pull out the drip tray.
- Empty the coffee grounds container and the drip tray. Rinse them both with warm water.
- Dry the metal contacts on the back of the drip tray.
- Refit the coffee grounds container and the drip tray.
- Rinse the water tank with clean water.
- Dismantle and rinse the cappuccino frother (see Chapter 5 ‘Maintenance – Rinsing the cappuccino frother’).
- Wipe the surface of the machine with a clean, soft, damp cloth (e.g. microfibre cloth).
Switching off

When you switch your IMPRESSA off, the spouts used to prepare a speciality coffee or milk are rinsed.

- Place one receptacle under the coffee spout and another under the cappuccino frother.
- Press the On/Off button.

‘Machine is rinsing.’, ‘Milk system is being rinsed.’. The spouts used to prepare a speciality coffee or milk are rinsed. The operation stops automatically and your IMPRESSA is switched off.

When the IMPRESSA is switched off with the On/Off button, the machine consumes less than 0.1W of standby energy. The machine can be completely disconnected from the power supply using the power switch.
Press the P button to enter programming mode. You can navigate through the programme items and permanently save the required settings simply by turning the Rotary Switch and using the variable buttons. The following settings can be made:

<table>
<thead>
<tr>
<th>Programme item</th>
<th>Sub-item</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td>‘Maintenance status (1/6)’</td>
<td>‘Clean’, ‘Descale’ (only if filter is not activated), ‘Change the filter’ (only if filter is activated), ‘Rinse the coffee system’, ‘Clean the milk system’</td>
<td>▶ Start the required maintenance programme here.</td>
</tr>
<tr>
<td>‘Product settings (2/6)’</td>
<td>‘Expert mode’</td>
<td>▶ Select your settings for speciality coffees and hot water.</td>
</tr>
<tr>
<td>‘Maintenance settings (3/6)’</td>
<td>‘Filter’, ‘Water hardness’ (only if filter is not activated), ‘Rinse the coffee system’, ‘Rinse the milk system’</td>
<td>▶ Indicate whether you are operating your IMPRESSA with or without a CLARIS Blue filter cartridge. ▶ Adjust the water hardness. ▶ Change the settings for the switch-on rinse and milk system rinse.</td>
</tr>
<tr>
<td>‘Machine settings 1(4/6)’</td>
<td>‘Save energy’, ‘Switch off after’, ‘Units’, ‘Factory setting’</td>
<td>▶ Select an energy-saving mode. ▶ Set the time after which the IMPRESSA should switch off automatically. ▶ Select the unit for the amount of water. ▶ Reset the permanently set values of all products to the factory settings.</td>
</tr>
</tbody>
</table>
In the programme item ‘Product settings (2/6)’ you can make individual settings for all speciality coffees and hot water. The following settings can be made:

<table>
<thead>
<tr>
<th>Product</th>
<th>Temperature</th>
<th>Coffee strength</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Two ristretti, two espressi, two coffees</td>
<td>‘Normal’, ‘High’</td>
<td>–</td>
<td>Volume: ‘25 ml’ – ‘240 ml’ (per cup)</td>
</tr>
<tr>
<td>Milk portion</td>
<td>–</td>
<td>–</td>
<td>‘3 sec.’ – ‘120 sec.’</td>
</tr>
</tbody>
</table>

Example: Proceed as follows to change the amount of milk for a latte macchiato from ‘16 sec.’ to ‘20 sec.’, the interval from ‘30 sec.’ to ‘40 sec.’ and the amount of water from ‘45 ml’ to ‘40 ml’.

Precondition: ‘Please select product: ’ is displayed.

- Press the P button.
  ‘Maintenance status (1/6)’

- Turn the Rotary Switch until the programme item ‘Product settings (2/6)’ is displayed.
- Press the ‘Expert mode’ button.
  ‘Expert mode’

Next select the button of the product for which you would like to make settings. No product is prepared at this point.

- Press the ‘Latte macchiato’ button.
  ‘Latte macchiato’

- Press the ‘Amount of milk’ button.
- Press the ‘<’ or ‘>’ button to change setting for the amount of milk to ‘20 sec.’.
Press the ‘Save’ button. ‘Saved’ appears briefly on the display.

Press the ‘Volume’ button.

Press the ‘<’ or ‘>’ button to change setting for the fill volume to ‘40 ml’.

Press the ‘Save’ button. ‘Saved’ appears briefly on the display.

Press the ‘Next’ button.

Press the ‘Interval’ button.

Press the ‘<’ or ‘>’ button to change setting for the interval to ‘40 sec.’.

Press the ‘Save’ button. ‘Saved’ appears briefly on the display.

Press the P button to exit programming mode.

‘Please select product:’

**Maintenance settings**

In the programme item ‘Maintenance settings (3/6)’ you can make the following settings:

- ‘Filter’
  - Activate the CLARIS Blue filter cartridge (see Chapter 1 ‘Preparing and using for the first time – Inserting and activating the filter’).

- ‘Water hardness’
  - If you do not have a filter cartridge, you will need to set the water hardness (see Chapter 1 ‘Preparing and using for the first time – Adjusting the water hardness’).

- ‘Rinse the coffee system’ / ‘Manual’
  - The switch-on rinse must be started manually.

- ‘Rinse the coffee system’ / ‘Automatic’
  - The switch-on rinse is started automatically.

- ‘Rinse the milk system’ / ‘After 10 min.’
  - You are prompted to rinse the milk system 10 minutes after preparation of a speciality coffee with milk.

- ‘Rinse the milk system’ / ‘Immediate’
  - You are prompted to rinse the milk system immediately after preparation of a speciality coffee with milk.
Example: Proceed as follows to make the machine prompt you to rinse the milk system immediately after preparing a speciality coffee with milk.

Precondition: ‘Please select product:’ is displayed.

P   > Press the P button.
    ‘Maintenance status (1/6)’

○ > Turn the Rotary Switch until the programme item ‘Maintenance settings (3/6)’ is displayed.
   > Press the ‘Rinse the milk system’ button.
   ‘Rinse the milk system’
   > Press the ‘Immediate’ button.
   > Press the ‘Save’ button.
   ‘Saved’ appears briefly on the display.
   ‘Maintenance settings (3/6)’

P   > Press the P button to exit programming mode.
    ‘Please select product:’

Energy-saving mode

In the programme item ‘Machine settings 1(4/6)’ / ‘Save energy’ you can permanently set an energy-saving mode (Energy Save Mode, E.S.M.©):

- ‘Inactive’
  - All speciality coffees, speciality coffees with milk and hot water can be prepared without having to wait.
  - Before milk preparation, the machine heats up.

- ‘Active’ (Energy saving of up to 40%)
  - Soon after the last preparation, the IMPRESSA stops heating up. As soon as the energy-saving temperature is reached, this is indicated in the display by the message ‘Save energy’ – this may take several minutes.
  - The machine heats up before coffee, hot water or milk preparation.

Example: Proceed as follows to change the energy-saving mode from ‘Inactive’ to ‘Active’.

Precondition: ‘Please select product:’ is displayed.

P   > Press the P button.
    ‘Maintenance status (1/6)’
4 Permanent settings in programming mode

- Turn the Rotary Switch until the programme item ‘Machine settings 1(4/6)’ is displayed.
- Press the ‘Save energy’ button.
- ‘Save energy’
- Press the ‘Active’ button.
- Press the ‘Save’ button.
- ‘Saved’ appears briefly on the display.
- ‘Machine settings 1(4/6)’

Press the P button to exit programming mode.

‘Please select product:’

Automatic switch-off

By instructing your IMPRESSA to automatically switch itself off, you can cut down your energy consumption. If this function is activated, your IMPRESSA switches off automatically after the preset time following the last action on the machine.

You can set the automatic switch-off time to 15 minutes or 0.5 – 15 hours.

Precondition: ‘Please select product:’ is displayed.

- Press the P button.
  ‘Maintenance status (1/6)’

- Turn the Rotary Switch until the programme item ‘Machine settings 1(4/6)’ is displayed.
- Press the ‘Switch off after’ button.
  ‘Switch off after’
- Press the ‘<’ or ‘>’ button to change the setting.
- Press the ‘Save’ button.
  ‘Saved’ appears briefly on the display.
  ‘Machine settings 1(4/6)’

- Press the P button to exit programming mode.
  ‘Please select product:’
Unit for amount of water

You can change the unit for the amount of water from ‘ml’ to ‘oz’.

Example: Proceed as follows to change the unit for the amount of water from ‘ml’ to ‘oz’.

Precondition: ‘Please select product:’ is displayed.

1. Press the P button.
2. Turn the Rotary Switch until the programme item ‘Machine settings 1(4/6)’ is displayed.
3. Press the ‘Units’ button.
4. Press the ‘oz’ button.
5. Press the ‘Save’ button.
   ‘Saved’ appears briefly on the display.
6. Press the P button to exit programming mode.
   ‘Please select product:’

Restore factory settings

In the programme item ‘Machine settings 1(4/6)’ / ‘Factory setting’ you can reset various settings to their factory settings:

- ‘Machine’
  - All customer settings (apart from the ‘filter’) are reset to factory settings. Your IMPRESSA then switches off.

- ‘Products’
  - The settings (amount of water, aroma, temperature etc.) for any product can be reset individually to the factory settings. The corresponding double product is also reset to the factory settings at the same time.

- ‘All products’
  - The settings (amount of water, aroma, temperature etc.) for all products are reset to the factory settings.

- ‘Display’
  - All display settings are reset to the factory settings.

Example: Proceed as follows to reset the values for ‘Espresso’ to the factory settings.

Precondition: ‘Please select product:’ is displayed.

1. Press the P button.
   ‘Maintenance status (1/6)’
4 Permanent settings in programming mode

Language

In this programme item you can set the language used by your IMPRESSA.

If you choose the wrong language by mistake, you can easily reset the machine to ‘English’: Press the P button to enter programming mode. Use the Rotary Switch (circled) to select programme item ‘5/6’ and then press the top left-hand button.

Example: Proceed as follows to change the language from ‘English’ to ‘Deutsch’.
Precondition: ‘Please select product:’ is displayed.

P Press the P button.

‘Maintenance status (1/6)’

P Press the P button.

‘Geräteeinstellungen (5/6)’

P Press the P button to exit programming mode.

‘Bitte wählen Sie Ihr Produkt:’
4 Permanent settings in programming mode

**Colour scheme**

In this programme item you can set the background colour for the display of your IMPRESSA.

Precondition: ‘Please select product:’ is displayed.

1. Press the P button.
   ‘Maintenance status (1/6)’
2. Turn the Rotary Switch until the programme item ‘Machine settings 2 (5/6)’ is displayed.
3. Press the ‘Colour scheme’ button.
   ‘Colour scheme’
4. Press the ‘<’ or ‘>’ button to change the setting.
5. Press the ‘Save’ button.
   ‘Saved’ appears briefly on the display.
6. Press the P button to exit programming mode.
   ‘Please select product:’

The selected background colour only applies on the selection page of the display showing the speciality coffees.

**Viewing information**

In the programme item ‘Information (6/6)’ you can view the following information:

- ‘Product counter’: Number of prepared speciality coffees, speciality coffees with milk and hot water
- ‘Maintenance counter’: Maintenance status and number of maintenance programmes performed (cleaning, descaling, changing the filter)
- ‘Version’: Software version

Precondition: ‘Please select product:’ is displayed.

1. Press the P button.
   ‘Maintenance status (1/6)’
2. Turn the Rotary Switch until the programme item ‘Information (6/6)’ is displayed.
3. Press the ‘Product counter’ button.
   The number of speciality coffees prepared is displayed.
4. Press the ‘t.’ button.
   ‘Information (6/6)’
5. Press the P button to exit programming mode.
   ‘Please select product:’
5 Maintenance

Your IMPRESSA has the following integrated maintenance programmes:

- Rinsing the machine (‘Rinse the coffee system’)
- Rinsing the cappuccino frother (‘Rinse the milk system’)
- Cleaning the cappuccino frother (‘Clean the milk system’)
- Changing the filter (‘Change the filter’)
- Cleaning the machine (‘Clean’)
- Descaling the machine (‘Descale’)

Clean or descale the machine, rinse the milk system or change the filter when you are prompted to do so.

Press the P button to view a list of the maintenance programmes (‘Maintenance status (1/6)’). By referring to the bar you can see how soon each maintenance programme is due. When the bar is completely filled with red, the IMPRESSA will prompt you to perform the maintenance programme.

The IMPRESSA will not prompt you to clean the milk system. In the interests of hygiene, you should clean the milk system daily when you have been preparing milk.

Rinsing the machine

You can initiate the rinse operation manually at any time.

Precondition: ‘Please select product:’ is displayed.

- Place a receptacle under the coffee spout.

P

- Press the P button.
  ‘Maintenance status (1/6)’

- Press the ‘Rinse the coffee system’ button.
  ‘Machine is rinsing.’, water flows out of the coffee spout.

The rinse stops automatically and ‘Please select product:’ appears on the display.
Rinsing the cappuccino frother

After each milk preparation, the IMPRESSA prompts you to rinse the milk system.

Precondition: ‘Rinse the milk system’ is displayed.

- Place a receptacle under the cappuccino frother.
- Press the Rotary Switch.
  ‘Milk system is being rinsed.’, water flows out of the cappuccino frother.
  The rinse stops automatically and ‘Please select product:’ appears on the display.

Cleaning the cappuccino frother

To ensure that the cappuccino frother always works properly, you should clean it daily when you have been preparing milk. Your IMPRESSA will not prompt you to clean the cappuccino frother.

CAUTION

If the wrong cleaning agent is used, the machine could be damaged and/or traces could be left behind in the water.

- Use only original JURA maintenance products.

JURA milk system cleaner is available from stockists.

Precondition: ‘Please select product:’ is displayed.

P

- Press the P button.
  ‘Maintenance status (1/6)’
- Press the ‘Clean the milk system’ button.
  ‘Cleaning agent for milk system’
- Pour 250 ml of fresh water into a receptacle and add one capful of milk system cleaner.
- Immerse the milk pipe in the receptacle.
- Turn the setting wheel of the cappuccino frother to the Milk Foam 🍀 or Milk 🍼 position.
- Place another receptacle under the cappuccino frother.
- Press the ‘Next’ button.
  ‘Milk system is being cleaned.’, water flows out of the cappuccino frother.
  ‘Water for cleaning milk system’
- Rinse the receptacle thoroughly, fill it with 250 ml of fresh water and immerse the milk pipe in the water.
Empty the other receptacle and place it under the cappuccino frother again.

Press the ‘Next’ button.

‘Milk system is being cleaned.’, the cappuccino frother and the pipe are rinsed with fresh water.

‘Please select product:’ appears on the display.

Carefully pull the cappuccino frother down and off.

Dismantle the cappuccino frother into its individual parts.

Rinse all parts of the cappuccino frother thoroughly under running water.

Reassemble the cappuccino frother.

Ensure that all individual parts are correctly and firmly connected to ensure correct operation of the cappuccino frother.

Firmly attach it to the connector.

After 50 litres of water have flowed through, the filter will cease to work. Your IMPRESSA will automatically prompt you to change the filter.

After two months, the filter will cease to work. You can check the elapsed time by referring to the date plate on the filter holder in the water tank.

If the CLARIS Blue filter cartridge is not activated in programming mode, you will not be prompted to change the filter.

Precondition: ‘Change filter’ is displayed.

Press the P button.

‘Maintenance status (1/6)’

Press the ‘Change the filter’ button.

‘Change the filter’

If you do not want to start changing the filter just yet, press the ‘L’ button. The prompt ‘Change filter’ remains active.
Press the ‘Next’ button.

‘Change filter’

- Remove and empty the water tank.
- Open the filter holder and remove the old CLARIS Blue filter cartridge and filter extension.
- Fit the filter extension on top of a new filter cartridge.
- Insert the filter cartridge into the water tank, exerting slight pressure.
- Close the filter holder. It will click into place audibly.
- Fill the water tank with fresh, cold water and reinsert the tank.

- Place a receptacle (at least 500 ml) under the cappuccino frother.
- Turn the setting wheel of the cappuccino frother to the Steam position ◐.
- Press the ‘Next’ button.
  ‘Filter is being rinsed.’, water flows out of the cappuccino frother.

You can interrupt rinsing of the filter at any time by pressing any button. Press the Rotary Switch ◐ to continue rinsing of the filter.

The water may be slightly discoloured. This is not harmful to health and does not affect the taste.

Rinsing of the filter stops automatically after approximately 500 ml. The machine heats up. ‘Please select product:’ appears on the display.
Cleaning the machine

After 200 preparations or 80 switch-on rinses, the IMPRESSA will prompt you to clean it.

**CAUTION**

If the wrong cleaning agent is used, the machine could be damaged and/or traces could be left behind in the water.

- Use only original JURA maintenance products.

- The cleaning programme lasts approximately 20 minutes.
- Do not interrupt the cleaning programme. The quality of cleaning will be impaired if you do so.
- JURA cleaning tablets are available from stockists.

Precondition: ‘Clean machine’ is displayed.

**P**

- Press the P button.
  - ‘Maintenance status (1/6)’
- Press the ‘Clean’ button.
  - ‘Clean’

- If you do not want to start cleaning just yet, press the ‘↓’ button. The prompt ‘Clean machine’ remains active.
  - Press the ‘Next’ button.
    - ‘Empty coffee grounds container’
  - Empty the drip tray and coffee grounds container and put them back into the machine.
    - ‘Please press the Rotary Switch.’
  - Place one receptacle under the coffee spout and another under the cappuccino frother.
  - Press the Rotary Switch.
    - ‘Machine is being cleaned.’, water flows out of the coffee spout.
    - The operation is interrupted, ‘Add cleaning tablet’.
  - Open the cover of the filler funnel for ground coffee.
  - Insert a JURA cleaning tablet into the filler funnel.
  - Close the cover of the filler funnel.
    - ‘Please press the Rotary Switch.’
Press the Rotary Switch. ‘Machine is being cleaned’, water flows repeatedly out of the coffee spout and the cappuccino frother. The operation is interrupted, ‘Empty coffee grounds container’.

Empty the drip tray and coffee grounds container and put them back into the machine. Cleaning is now complete. The IMPRESSA is once more ready for use.

### Descaling the machine

The IMPRESSA builds up deposits of limescale over time and automatically prompts you to descale it when necessary. The degree of calcification depends on the hardness of your water.

#### CAUTION

If the descaling agent comes into contact with the skin or eyes, this can cause irritation.

- Avoid contact with the skin or eyes.
- Rinse off descaling agent with clean water. Should you get any descaling agent in your eye, see a doctor.

#### CAUTION

If the wrong descaling agent is used, the machine could be damaged and/or traces could be left behind in the water.

- Use only original JURA maintenance products.

#### CAUTION

If the descaling operation is interrupted, there may be damage to the machine.

- Allow the descaling programme to run to the end.

#### CAUTION

If the descaling agent comes into contact with sensitive surfaces (e.g. marble), damage cannot be ruled out.

- Clean up any splashes immediately.

- The descaling programme lasts approximately 45 minutes.
- JURA descaling tablets are available from stockists.
- If you use a CLARIS Blue filter cartridge and this is activated, you will not be prompted to descale.
Precondition: ‘Decalcify machine’ is displayed.

P  ▶ Press the P button.
  ‘Maintenance status (1/6)’
  ▶ Press the ‘Descale’ button.
  ‘Descale’

If you do not want to start descaling just yet, press the ‘↓’ button. The prompt ‘Decalcify machine’ remains active.

  ▶ Press the ‘Next’ button.
    ‘Empty drip tray’
  ▶ Empty the drip tray and coffee grounds container and put them back into the machine.
    ‘Pour descaling agent into water tank.’
  ▶ Remove and empty the water tank.
  ▶ Completely dissolve the contents of one blister (three JURA descaling tablets) in a receptacle holding 500 ml of water. This may take several minutes.
  ▶ Pour the solution into the empty water tank and insert it into the machine.
    ‘Please press the Rotary Switch.’
  ▶ Remove the cappuccino frother.
  ▶ Place a receptacle (at least 500 ml) under the connector of the cappuccino frother.
  ◆ Press the Rotary Switch.
    ‘Machine is being descaled.’, water flows repeatedly out of the connector of the cappuccino frother.
    The operation stops automatically, ‘Empty drip tray’.
  ▶ Empty the receptacle under the connector of the cappuccino frother.
  ▶ Empty the drip tray and coffee grounds container and put them back into the machine.
    ‘Fill water tank’
  ▶ Remove the water tank and rinse it thoroughly.
  ▶ Fill the water tank with fresh, cold water and reinsert the tank.
    ‘Please press the Rotary Switch.’
  ▶ Refit the cappuccino frother.
Place a receptacle under the cappuccino frother and another under the coffee spout.

Press the Rotary Switch.

 masturdescaled,' water flows out of the cappuccino frother and the coffee spout.

'machine is heating', 'machine is rinsing', water flows out of the coffee spout.

The operation stops automatically, 'empty drip tray'.

Empty the drip tray and coffee grounds container and put them back into the machine.

Descaling is now complete. The IMPRESSA is once more ready for use.

If the descaling operation stops unexpectedly, rinse the water tank thoroughly.

Cleaning the bean container

Coffee beans may be covered with a slight oil film which remains on the walls of the bean container. These traces may negatively affect the coffee result. For this reason clean the bean container from time to time.

Precondition: 'fill bean container' is displayed.

Switch the machine off with the On/Off button.

Switch the machine off at the power switch.

Open the bean container cover and remove the aroma preservation cover.

Clean the bean container with a soft, dry cloth.

Fill the bean container with coffee beans, then close the aroma preservation cover and the bean container cover.

Descaling the water tank

Limescale deposits may form in the water tank. To ensure correct function of the machine, descale the water tank from time to time.

Remove the water tank.

If you use a CLARIS Blue filter cartridge, remove this.

Descale the tank with a mild conventional descaling agent in accordance with the manufacturer's instructions.

Rinse out the water tank thoroughly.

If you use a CLARIS Blue filter cartridge, insert this again.

Fill the water tank with fresh, cold water and reinsert the tank.

Transport and environmentally friendly disposal

Transport / Emptying the system

In order to protect the IMPRESSA from frost during transport, the system must be emptied.

Precondition: ‘Please select product:’ is displayed.

- Carefully pull the cappuccino frother down and off.
- Place a receptacle under the connector of the cappuccino frother.
- Press the ‘1 portion milk’ button.
  ‘Machine is heating.’
As soon as the machine has heated up, ‘Please select product:’ appears.
- Press the ‘1 portion milk’ button again.
  ‘1 portion milk’, hot steam is discharged from the connector.
- Remove and empty the water tank.
  - Turn the Rotary Switch until ‘60 sec.’ is displayed.
    Steam will continue to be discharged from the connector until the system is empty.
    ‘Fill water tank’
- Press the On/Off button.
  The IMPRESSA is switched off.

Disposal

Please dispose of old machines in an environmentally neutral way.

Old machines contain valuable, recyclable materials which should be recycled. Please therefore dispose of old machines via suitable collection systems.
